### SUMMARY

As a fullstack developer, I have a strong track record of building scalable web, mobile, and desktop applications. My expertise lies in React.js, React Native, Node.js, and Electron.js, with a focus on API integration and UI/UX optimization. I collaborate effectively with teams and clients to deliver high-quality solutions, while my proactive problem-solving skills enable me to tackle challenges swiftly and efficiently.

### SKILLS

#### Frontend , Backend and Tools

React, React Native, Electron.JS, JavaScript, SQL, Tailwind, Bootstrap, Node.js, Express.js, MongoDB  
Git, GitHub, API Testing(postman, hopscotch)

### EXPERIENCE

#### Software Intern

07/2024 07/2025  
India

[Noitavonne, india](#)

With expertise spanning software development and user experience design, Noitavonne delivers innovative solutions

- Designed and optimized key features for US-based projects like IPDM, Model Mafia, Stream Deck, and Click My Photo using React, React Native, and Electron.js to enhance functionality and user experience
- Enhanced UI/UX by implementing responsive designs and improving performance efficiency
- Integrated APIs and collaborated with a cross-functional team to resolve technical challenges and improve system reliability
- Conducted debugging, testing, and deployment of application updates to ensure seamless user experience
- Participated in team meetings and code reviews, contributing ideas and feedback to enhance project quality

### PROJECTS

#### Car Exhibition

(Web-site)

- This project is a web application built with Vite and styled using Tailwind CSS showcasing a large-scale car exhibition, featuring eventschedules, participant registration galleries, and exhibitor details

#### Click My Photo

(Desktop-Application)

- Developed a desktop application for photographers to manage and resize images efficiently. Users can retrieve images from local storage, organize them into structured folders, and resize selected images
- Integrated API functionality to send images directly to event organizers or clients, streamlining workflows in the photography industry

#### Stream Deck

(Mobile-Application)

- Contributed to building a React Native-based live streaming platform, integrating APIs, designing attractive mobile UIs, and ensuring seamless functionality, including features like a Go Live Camera for streaming and uploading videos to your created channel and much more

#### Tech Tinder

(Web-site)

- MERN stack-based website focused on backend development. it enables users to send connection requests, accept or reject them, and initiate real-time chats with connected users using Socket.io along with Authentication along with profile management

### EDUCATION

#### Masters in Computer Application

DY Patil Technical University

07/2023 07/2025  
India

### TRAINING / COURSES

#### [FullStackDevelopmentCourse](#)

Seed Infotech LTD, Pune
